Creating Next-Gen Cloud Capabilities for a US-based Cybersecurity Provider

Key Challenges

- Losing market share to cloud-native competitors

- Legacy platforms hindering scalability, modernization, and user experience

- Outdated user experience impacting customer experience

Business Solution

- Partnered with client to build a next-generation cloud platform

- Adopted agile development for rapid feature rollouts and market responsiveness

- Migrated to a secure, scalable cloud architecture on AWS

- Implemented DevOps practices for continuous integration and delivery (CI/CD)

Business Impact

>6
months time taken to launch SaaS platform

70%
contribution strategic initiatives

Increased velocity with frequent SaaS releases via. CI/CD

Retained market share via. cloud-based modernization
