

Customized payee portal for Bank's mega treasury automotive client

Key Challenges

- Lack of centralized control to manage payments across stores
- Absence of mandate for users to link their bank accounts for payment information and validation
- Requirement of automated payment remittances to reduce errors and save cost and time

Business Solution

- Deployed IncedoPay for centralized visibility and control across stores
- > Payee portal for simplified UI, UX, digitized payee onboarding, validation and automated remittances across the payment journey
 - > Integrated clients payee portal with bank's RTP (Real Time Processing) payments engine for cross-selling opportunities

Business Impact

1500+

stores' payments managed with centralized control

3x

user enrollment on client portal

1st

in the automotive industry to offer Real Time Payments
