

Career Track - Associate, Data Engineer

Build Your own Job Description!

Data Engineers at Incedo develop the next-generation data-science and Engineering technologies that impact Fortune 20 customers. Our products need to manage information on a massive scale, so we're always looking for engineers who bring fresh ideas from all areas— distributed computing, large-scale system design, data storage, and UI design. Our engineers are versatile, are leaders and are enthusiastic about taking on new problems across the fullstack. Does this sound like you?

As a Data engineer, you will work in a variety of settings to build systems that collect, manage, and convert raw data into usable information for data scientists and business analysts to interpret. Their ultimate goal is to make data accessible so that various stakeholders and client can use it to evaluate and optimize their performance.

What are we looking for ?

Technical skills and competency

- Strong mathematical skills, analytical skills and mastery of web analytics techniques to transform raw data into insights and recommendations that will effectively support decision making processes
- Knowledge of statistical techniques and expertise in use of statistical packages
- Quantitative and qualitative skills with proven data interpretation abilities and technical skills
- Experience with Statistical analysis methods
- Knowledge of multi-site website functionality, tracking, concepts and tagging infrastructure

Other skills and competence

- Strong analytical and problem-solving skills.
- Highly motivated with a sense of ownership and accountability.
- Quick learner with a great attitude.
- Genuine team player, able to work well and pleasantly in a team and work independently for the team
- Ability to communicate effectively with technical and non-technical audiences
